

Dear Agents,

Now that you have signed your contract, written your Bio, sent in a Picture got a new phone number and Peter has made you a web page you are ready to go, what are you going to do with your territory? Questions like. How do I start making Kreativ Dental known? How do I get potential clients to contact me? These are thoughts you are probably considering. We are here to assist you with this. Attila has allocated funds for us to develop recognition of the Kreativ brand in your territories in America and Canada. The Clinic will pay for preapproved advertising. You know your states think about where you believe advertising would work best. Be imaginative and provide some costs. Everything will be considered, talk to us and we will forward your ideas to Attila and even hopefully help improve your ideas!

Our goal is simple: we want people across the United States and Canada to know that Kreativ Dental in Budapest offers a trusted, established, and affordable option for dental treatment abroad.

Each agent plays an important role in spreading awareness within their own community. With consistent effort in every state and province, we can build a powerful network of local representatives who are visible, professional, and easy for potential patients to find when they need dental solutions.

We don't know your communities and states as you do.

Your role using your local knowledge includes

- Placing advertisements in local newspapers and community publications
- Submitting press releases to local media when appropriate (example below)
- Advertising on Facebook and local community pages
- Creating awareness through local groups, clubs, senior communities, churches, universities (wisdom teeth), and professional networks
- Hosting open days in suitable local venues where larger groups of people can attend (I am prepared to travel to assist you in holding events)
- Speaking with people who are facing overwhelming dental quotes and help them to understand their options
- Helping people feel confident, supported, and informed before they make a decision about travelling to Budapest

Local newspapers are still very valuable, especially for reaching people who trust community news and prefer familiar local contact. A simple newspaper advertisement or community press release can introduce you as the local Kreativ Dental representative and explain that you are available to help people understand the process of dental treatment in Budapest.

The focus should be on education, patient support, affordability, and the fact that Kreativ Dental has been treating international dental patients for many years. We should always be careful not to promise a clinical outcome or guarantee a treatment plan before the patient has been examined by the dentists in Budapest.

Agents should begin by making a list of local newspapers, senior magazines, community newsletters, church bulletins, university publications, and regional lifestyle magazines in their area. From there, they can submit a simple press release, ask about advertising rates, and explore opportunities to host an educational open day.

The more visible each local agent becomes, the stronger the Kreativ Dental network becomes. Our success will come from consistency, professionalism, community trust, and making sure that every potential patient feels supported from their first question through to the completion of their treatment. They then become your advocates and in turn build your business.

Especially to begin with, let us work directly with you and your client, let us write your emails with you, and teach you how to respond effectively. We can talk directly with your client and answer their questions (hopefully as a 3-way call and best prearranged so I don't have to get out of the shower!) This allows you to focus on what you know and at the same time gives you the confidence that you can give them the answers they need quickly.

Halldor is our social media expert at the clinic, he is very good, and is currently working on increasing our exposure in the U.S. and Canada you have access to him, and he is a wealth of knowledge.

The starting point is that you use your local knowledge and spears of influence and develop ideas to start to impact your territory. We will assist you in doing this; you have the local knowledge! This is a great opportunity to create a very lucrative income and at the same time help people achieve a great dental outcome and saving.

Regards,
Craig and Bronwyn, National Agents.

OUT FOR IMMEDIATE RELEASE

Kreativ Dental Representative Helps U.S. Patients Discover Award-Winning Dental Treatment in Beautiful Budapest – With Potential Savings of Up to 70%

[City, State] – [Date] – A Kreativ Dental representative has been appointed for [insert territory] to help U.S. dental patients learn about an exciting and affordable alternative to overwhelming dental treatment costs at home.

Kreativ Dental is an award-winning, world-renowned dental clinic in Budapest, Hungary, specializing in dental tourism and has been a leader in dental tourism for 28 years, welcoming international patients who are looking for professional dental treatment at a more affordable price.

Across the United States, many people are receiving dental quotes that feel impossible to manage. Patients who need crowns, implants, bridges, dentures, extractions, or full-mouth restoration are often shocked by the cost of treatment and unsure where to turn next.

Kreativ Dental offers many patients the opportunity to receive world-class dental treatment while potentially saving up to 70% compared with many U.S. dental quotes. For patients who have delayed treatment because of cost, this can make high-quality dental care feel possible again.

One of the great advantages of Kreativ Dental is that everything is arranged under one roof. Patients can have their consultation, treatment planning, dental procedures, laboratory work, and follow-up care coordinated through one experienced clinic. This makes it possible for suitable treatment to be arranged in blocks of days at a time, rather than being stretched out over months or even years, as can often happen in the United States.

Budapest is one of Europe's most beautiful and historic cities, known for the Danube River, the magnificent Parliament Building, thermal baths, grand cafés, historic markets, beautiful bridges, and a warm, welcoming atmosphere. For many patients, travelling to Budapest for dental treatment is not only a practical financial decision, but also a memorable European experience.

To make the journey easier and more comfortable, Kreativ Dental has created special offers for qualifying U.S. dental patients, including:

- 3 free nights of accommodation
- A \$350 airfare rebate
- A complimentary, no-obligation consultation
- Accommodation at a partner hotel with free breakfast
- Transportation support between the hotel and clinic
- Airport transfer assistance for arriving patients

These special arrangements are designed to help U.S. patients feel supported from the moment they begin asking questions through to their arrival in Budapest.

The role of a Kreativ Dental representative is to help patients understand the process before they travel. This includes answering general questions, explaining how appointments are arranged, helping patients prepare for their visit, and guiding them through the experience in a friendly and reassuring way.

"Many people are overwhelmed when they receive a large dental quote in the United States," said [insert agent name], Kreativ Dental representative for [insert territory]. "When they discover that they may be able to save up to 70% and receive treatment at an award-winning dental clinic in beautiful Budapest, it can completely change what they thought was possible."

Kreativ Dental has been treating international patients for 28 years and understands the needs of people travelling from abroad. The clinic provides professional dental care in Budapest, where each patient is personally examined by the dental team before final treatment decisions are made.

It is important for patients to understand that any dental plan discussed before arrival is considered theoretical until they have been examined in person by the dentists at Kreativ Dental. Representatives do not make clinical decisions or promise treatment outcomes. Their role is to provide information, explain the process, and help patients feel prepared and supported.

For patients who are tired of delaying treatment because of cost, Kreativ Dental may offer a life-changing opportunity: access to professional dental care, potential savings of up to 70%, treatment arranged efficiently in Budapest, and the chance to experience one of Europe's most beautiful cities.

Patients interested in learning more about Kreativ Dental, the special U.S. patient offers, and the experience of travelling to Budapest for dental treatment can contact:
